Prescription-Strength Protection

For a Lifetime  
 Made Easy

## Greater Fluoride Uptake<sup>1</sup>

FluoriMax® 5000 provides increased fluoride uptake into your tooth structure for maximized protection against cavity-causing foods and drinks.

## Cavity Risk Factors

Common risk factors for cavity formation include:

Consumption of sticky and sugary foods and beverages such as crackers, candies, and sodas.

Dry mouth caused by medications or health issues.

Irregular dental hygiene regimen with fluoride toothpaste twice daily or infrequent dental appointments.

## Usage Instructions

### 01

Use only a pea-sized amount of paste for each brushing.

### 02

After brushing, adults and children older than six years of age should spit out excess paste and foam.

### 03

Do not rinse your mouth with water (for children 6-12 years of age spit out excess paste and foam, then thoroughly rinse mouth with water).

### 04

An adult should supervise the brushing of any child needing assistance with proper brushing and rinsing suggestions.
