Post-Webinar Test Questions:

Dr. Marielle Pariseau, DMD – Beyond the Management of Caries: What Is Possible?

1. What is a sentinel health event?
 - a. Minor, expected fluctuation in population health statistics
 - b. Preventable conditions whose occurrence signals underlying system failures.
 - c. A routine administrative error that does not affect patient safety
 - d. A seasonal trend in disease incidence that recurs annually

2. To qualify as a sentinel health event, a condition must be
 - a. Measurable and preventable
 - b. Responsive to public health interventions
 - c. Reflective of social or structural determinants
 - d. Predictive of broader systemic risk
 - e. All of the above

3. When caries sounds the early alarm in the mouth, it reveals the same dietary stress that drives pancreatic exhaustion, liver overload, and brain insulin resistance.
 - a. True
 - b. False

4. The way forward can include:
 - a. Integrating caries as a reportable condition into national surveillance.
 - b. Promote team-based models in primary care.
 - c. Integrate targeted data from the mouth into electronic health records.
 - d. Call for a joint declaration from the WHO, FDI, and WFPHA to define caries as a sentinel health event

5. Chairside protocol should include one goal for the patient's teeth and one goal for their body.
 - a. True
 - b. False
