

**Post-Webinar Test Questions:**  
**Dr. Doug Young & Dr. Hien Ngo – Prevention in Dentistry Using Glass Ionomer Restoratives and Sealants**

1. Selective/partial caries removal:
  - a. Is backed by high levels of evidence and you will **not** lose your dental license
  - b. Works by creating clean perimeter margins but not in the deeper areas near the pulp
  - c. Clean and sealed margins block nutrient sources from reaching any bacteria
  - d. No nutrients mean no acid and the lesion will arrest
  - e. All of the above
2. Glass Ionomer restorations treat caries lesions chemically.
  - a. True
  - b. False
3. Which of the following is a mistake when using glass ionomer restoratives and sealants?
  - a. Heat up the Glass Ionomer Capsule before mixing
  - b. Make sure you remove biofilm, pellicle, and smear layer before placing Glass Ionomer material
  - c. Always apply Glass Ionomer to a moist surface
  - d. Never let the surface dry
4. Glass Ionomer restorations have more recurrent decay than amalgam.
  - a. True
  - b. False
5. Properly placed Silver Diamine Fluoride has less aerosol than placing a restoration with a handpiece.
  - a. True
  - b. False
6. SMART restorations can combine Silver Diamine Fluoride, selective caries removal, Glass Ionomer Cements and result in less aerosol.
  - a. True
  - b. False
