

Dr. Horst “Minimally Invasive Maximally Effective Caries Management” Test Questions

1. Which of the following dental procedures generates significant microbial aerosols?
 - a. Intraoral examination
 - b. Scaling
 - c. Brushing teeth
 - d. Extraoral examination

2. At what stage of the caries process does the ADA recommend placing a restoration?
 - a. Visible demineralization (E1-E2, ICDAS.1-2)
 - b. When caries has reached the dentinoenamel junction (DEJ; E2-D1, ICDAS.1-3)
 - c. When caries is in the dentin (D1-D3, ICDAS.3-6)
 - d. When the lesion is cavitated (D2-D3, ICDAS.5-6)

3. What dental procedure reliably stops caries lesions from growing?
 - a. Circumferentially sealing all margins of the caries lesion
 - b. Placing SDF once for 3 minutes
 - c. Placing Fluoride varnish every 3-6 months
 - d. Removing the lesion

4. What is necessary for a good seal with any dental material?
 - a. A hard and stable enamel or dentin surface
 - b. Removal of caries from the cavosurface margin
 - c. Removal of plaque and pellicle from the cavosurface margin
 - d. All of the above

5. What does SDF due to caries lesions?
 - a. Makes the lesion more resistant to acid demineralization
 - b. Hardens all affected and infected dentin and demineralized enamel
 - c. Kills bacteria and prevents them from re-invading the lesion
 - d. All of the above

Name: _____ Degree: _____ Date: _____

Office Phone: _____ Email Address: _____

Office Name: _____ AGD Number: _____

(Write none if you don't have an AGD Number)

Office Street Address: _____

Office City: _____ Office State: _____ Office Zip: _____

Please email your completed test to customerservice@elevateoralcare.com for grading and recording.

An AGD PACE Completion Certificate, or corrections to the answers, is needed to obtain a passing score of 80%. This certificate will be emailed to your address above within three weeks for one continuing education hour. Please call us at 877-866-9113 for any questions.
